Shashank Mohan

Quantitative Analysis, Rhodium Group

Shashank Mohan leads the development and management of Rhodium Group's suite of economic models and other quantitative tools. RHG combines policy experience, quantitative economic tools and on-the-ground research to analyze disruptive global trends. Mr. Mohan works across RHG's practice areas to analyze the impact of policy proposals and structural developments on specific markets and broader economic trends.

Mr. Mohan is author of *America's Energy Security Options* (2011), *Assessing the American Power Act* (2010), and *A Green Recovery?* (2009), among other publications.

Prior to RHG, Mr. Mohan worked with Columbia University's Earth Institute and the World Bank to design an electricity expansion model for Kenya and Senegal and was a program assistant at the South Asia Institute. He has a background in information technology, with a previous career in software engineering at Microsoft.

Mr. Mohan holds an MPA from School of International and Public Affairs at Columbia University and is a graduate of the Indian Institute of Technology (IIT), Kharagpur.
