

CAREERS

Research Analyst – US Energy & Climate

Rhodium Group is recruiting a Research Analyst to join the company's Energy & Climate team. Preferred location is one of Rhodium's East Coast offices in Massachusetts, New York or North Carolina though Rhodium's Oakland, CA office is also a possibility.

POSITION DESCRIPTION

Rhodium is looking for an entrepreneurial and talented research analyst to join our Energy & Climate team. You will conduct original energy and environmental policy and market research primarily at the US federal level for policymakers and the general public, as well as clients in the philanthropic, public and private sectors. You will work with Rhodium policy experts, economists, energy modelers and data engineers in tackling some of the most challenging energy and environmental issues facing the US and the world.

QUALIFICATIONS

Attractive candidates will have the following qualifications:

- Master's degree in economics, political science, public policy, engineering, or environmental science (or equivalent work experience in those fields).
- 2-4 years of experience working in energy and environmental policy, preferably in federal energy policy. Experience working in Congress or in the federal Executive Branch is a plus.
- Strong understanding of federal legislative and regulatory processes and experience conducting legislative/regulatory analysis.
- Strong mathematics and statistics background and proficiency in manipulating and analyzing large data sets.
- Excellent writing and presentation skills.
- Professionalism and intellectual curiosity.
- Organized and self-directed with proven problem-solving skills.
- Experience with energy system models, such as NEMS, IPM, ReEDS, MARKAL or GCAM a plus.
- Basic programming knowledge in R or Python a plus.
- Experience in public engagement with stakeholders and decision makers and willing to travel domestically periodically.
